

HOECHSTAEDTPLATZ · 1200 WIEN

ACE Escapes. Booking flow, *milestone one.*

Six screens the guest moves through to reserve a room — from the list, to a single room, to dates, then twice through their own details. The mood is editorial and quiet. Long copy is welcome; pre-emptive errors are not. *What follows is the screen-by-screen specification.*

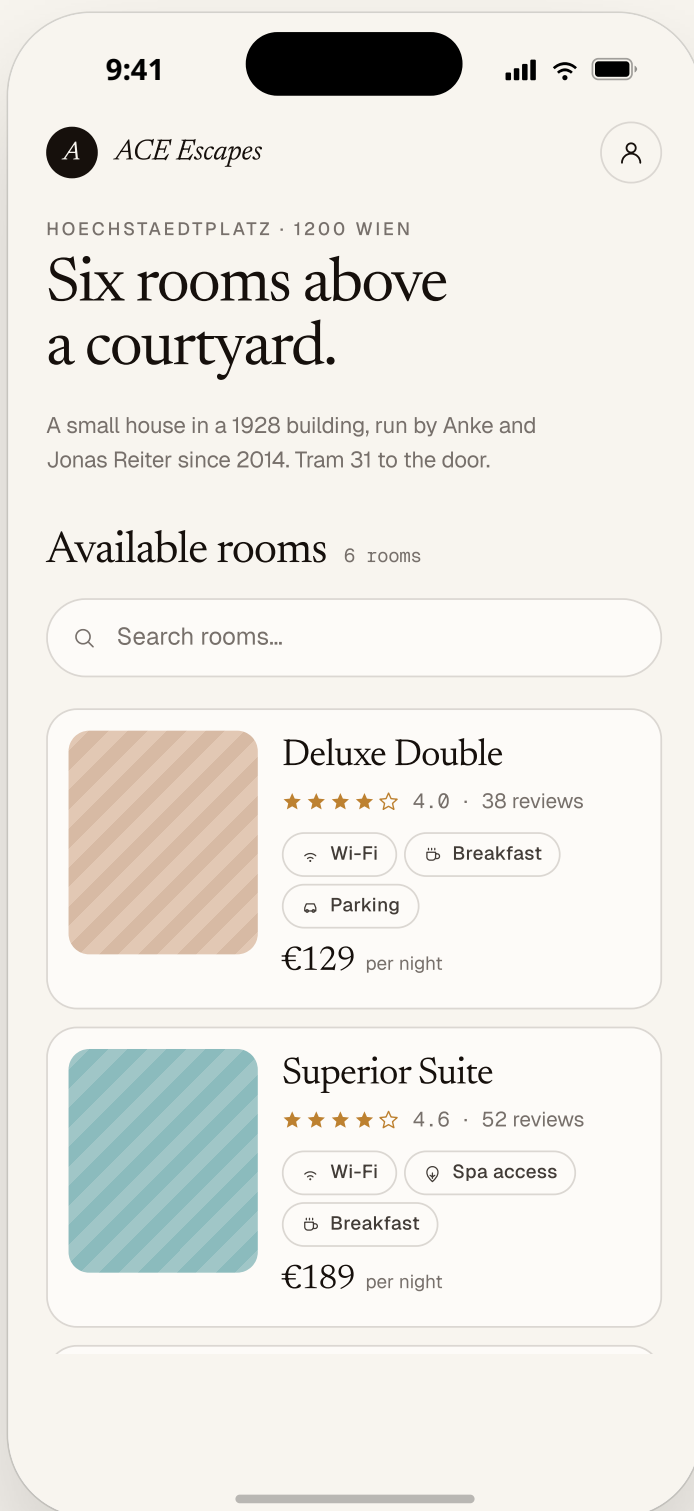

User flow

6 screens · core booking path

01	Room List	p. 02	02	Room Detail	p. 03
	Entry point. Browse the six rooms with pagination, search, and a glance at price + extras.			A photo, the description, included extras, and the price footer. The save action drops the room into a wishlist for later.	
03	Availability	p. 04	04	Your Details	p. 05
	A Mon-first calendar with selectable date ranges. Unavailable days are struck through and inert.			Step 1 of 2. Name + email + a confirmation field. Breakfast is a binary toggle.	
05	Review	p. 06	06	Confirmed	p. 07
	Step 2 of 2. The summary the guest signs off on — room, stay, guest, price — with edit affordances per section.			Success state. Booking ID, summary, address with map, contact info. No back action.	

01 Room List

Screen 1 of 6

Entry point. Browse the six rooms with pagination, search, and a glance at price + extras.

Stars indicate guest rating. Chips show room extras (Wi-Fi, breakfast, parking) at a glance.

Tap card → Open Room Detail

Search input → Filter by room name

Pagination → Load next set of rooms

Profile pill → Open guest profile

02 Room Detail

Screen 2 of 6

A photo, the description, included extras, and the price footer. The save action drops the room into a wishlist for later.

Hero crops to a 22 px radius. Footer holds price + the primary CTA, glass-blurred over content.

Photo arrows → Cycle through room photos

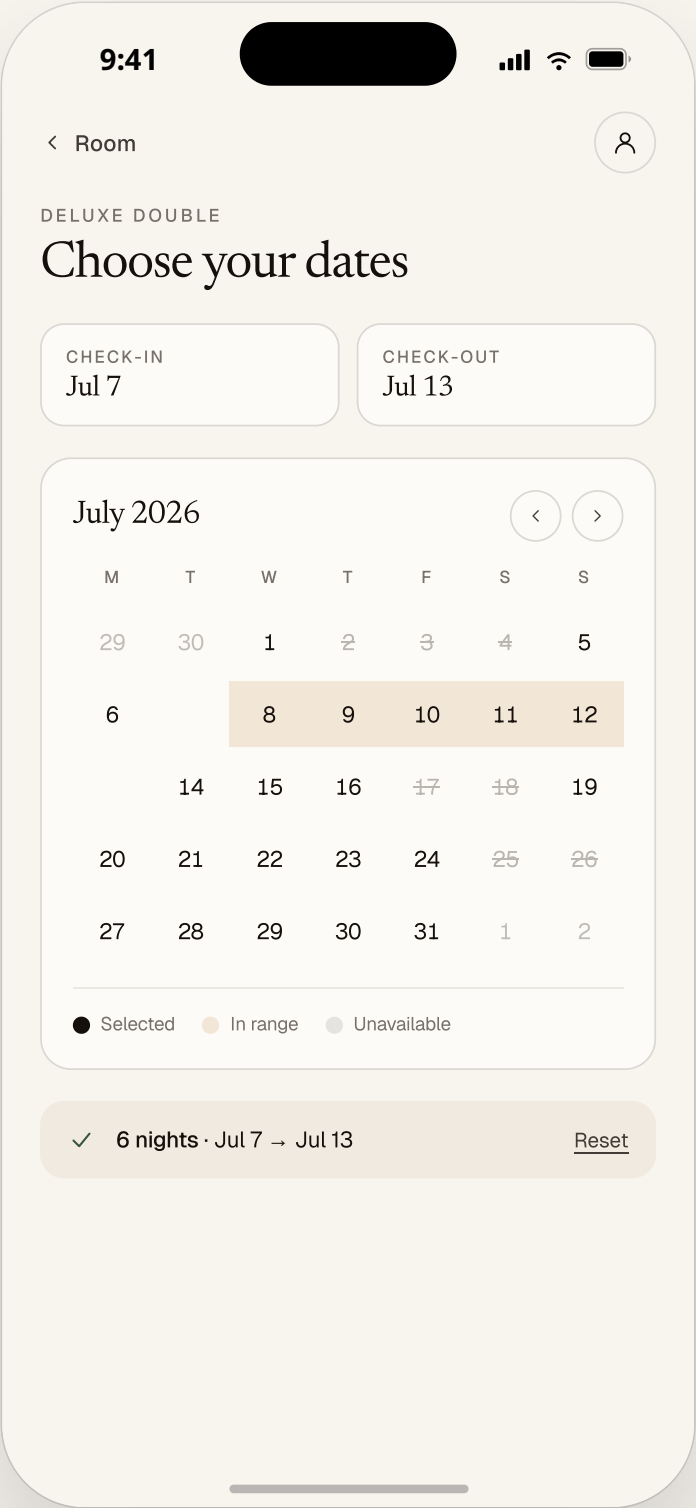

Heart → Save / unsave to wishlist

Check availability → Continue to date picker

Back → Return to Room List

03 Availability

Screen 3 of 6

A Mon-first calendar with selectable date ranges.

Unavailable days are struck through and inert.

The footer math updates live as a range is built. Crossing an unavailable day re-anchors check-in.

Tap day	→	Set check-in, then check-out
Month arrows	→	Navigate forward / back
Reset	→	Clear the selected range
Book now	→	Continue to Step 1 of 2

04 Your Details

Screen 4 of 6

9:41

BREAKFAST INCLUDED?

✓ Yes, please

No, thank you

* Required. We'll send confirmation in under a minute.

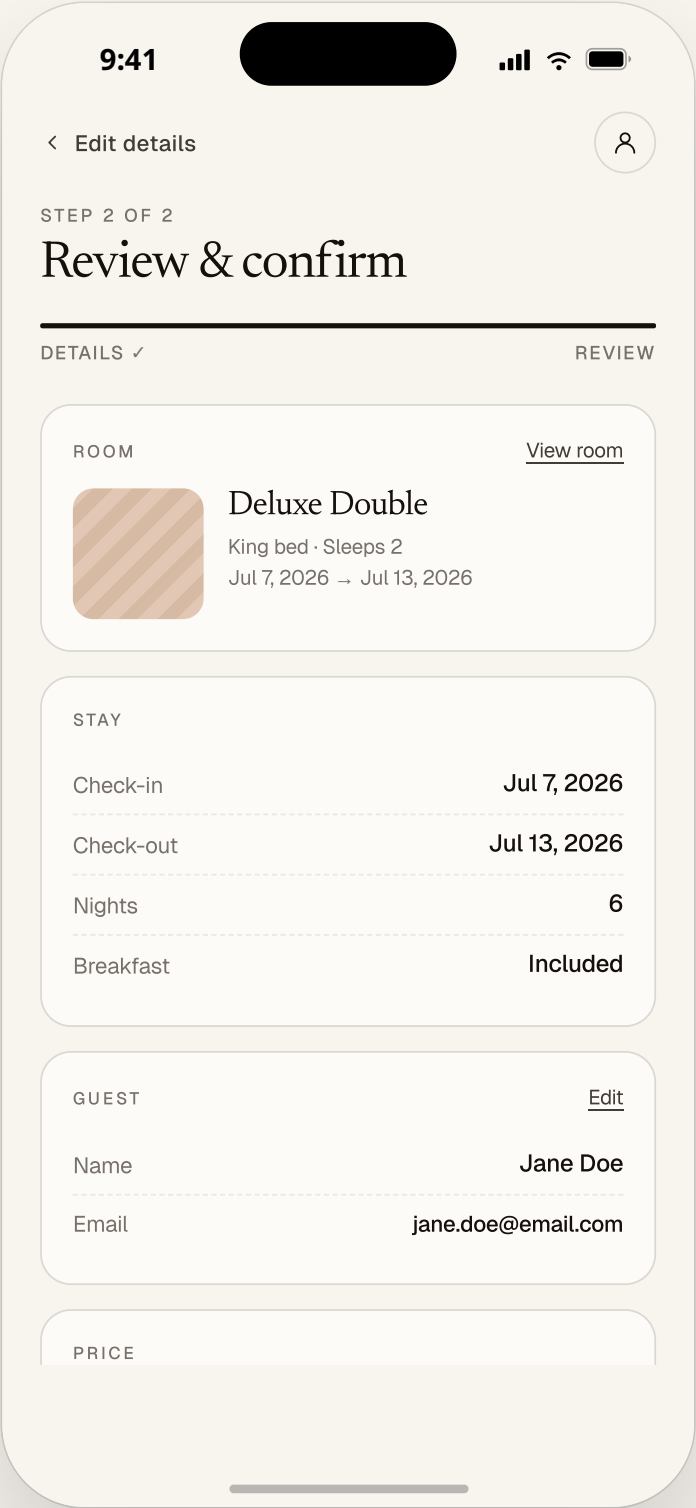

Step 1 of 2. Name + email + a confirmation field. Breakfast is a binary toggle.

Progress bar fills to 50 %. Email regex check + match check both run before the CTA enables.

Inputs	→ Required; validated on blur
Confirm email	→ Inline error when emails do not match
Breakfast Y/N	→ Defaults to Yes — included in price
Review booking	→ Continue to Step 2 of 2

05 Review

Screen 5 of 6

Step 2 of 2. The summary the guest signs off on – room, stay, guest, price – with edit affordances per section.

€3.20/night Vienna city tax shown as a separate line. Total typeset in the display serif.

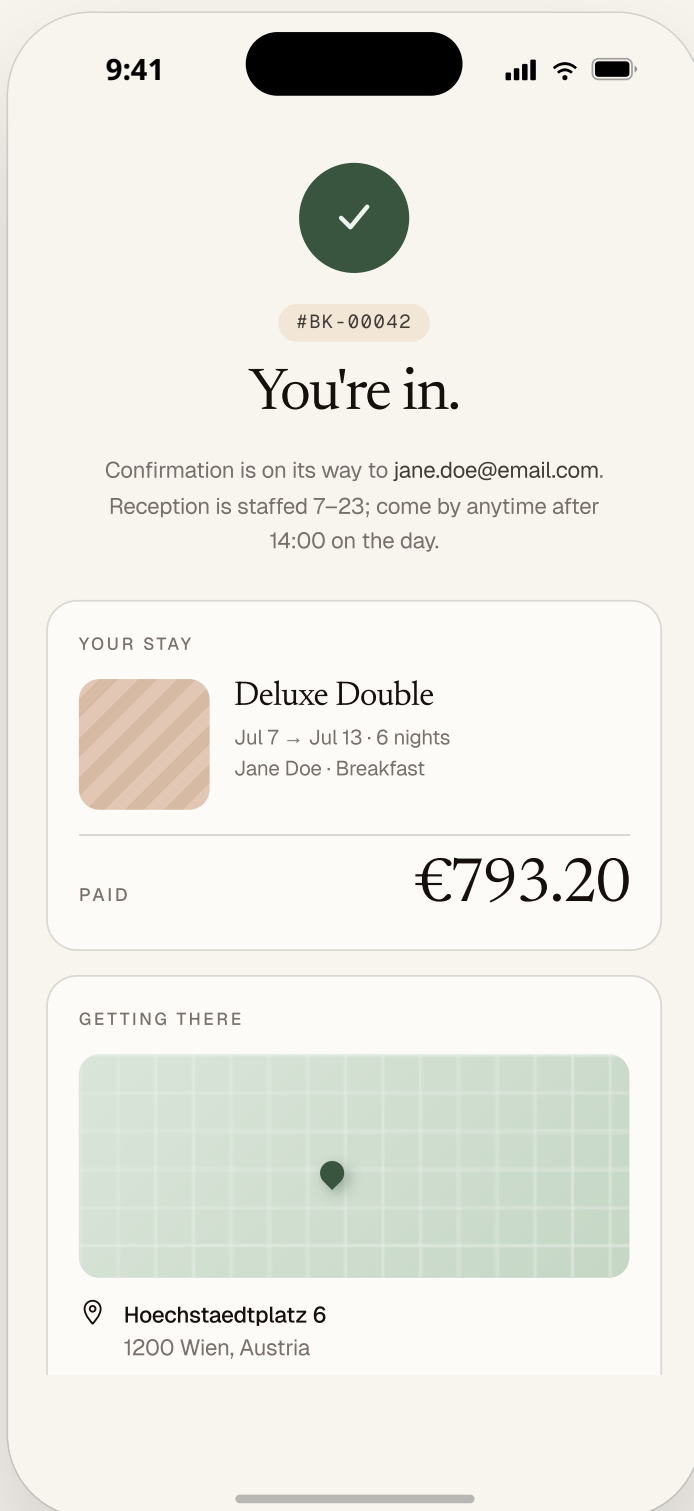

Edit (Guest) → Return to Step 1

View room → Open the room detail again

Confirm booking → Generate booking ID, advance to Confirmed

06 Confirmed

Screen 6 of 6

Success state. Booking ID, summary, address with map, contact info. No back action.

Booking IDs are random per session — paper prototype mood. Hard reset of the flow on dismissal.

Open in Maps → Hand off to the OS map app

Email / Phone → Direct hotel contact

Print → Browser print dialog for confirmation

Back to home → Return to Room List, fresh state
